Customer Case Study
DEVX

" **Accqtrax Automation Pvt Ltd** has to its credit the automation of scalable Access Control Solution for multi location offices"

About Customer

DevX, a co-working cum accelerator has its wings spread to multiple avenues of the value chain within the space and innovation well-aligned with the fundamentals of the business from day Zero.

Challenges

DevX required a scalable security solution to accommodate the growing number of offices and strengthen on-premise security. Due to a large number of tenants in the premises, they needed a multi-tenant access control platform, with features ensuring data security.

Requirement

- A multitenant and scalable access control solution for offices and visitors
- Protecting against data loss and ensuring business continuity Access management solution
- for tenant's and visitor's Multiple Report formats for viewing
- T&A and IN & OUT of the employees

Solution

- ROSSLARE Multiple-door Access Controller along with the RFID Readers and EM Locks installed at Various Doors.
- The RFID Readers along with EM Locks captures all the details of the users along with the door status and alerts which is then stored in controller
- ROSSLARE'S In-House developed Software has been used to cater to mu;tiple report patterns, which includes that of the Count, User movement etc
